Social Pedagogy and Selected Aspects of the Primary Prevention of Drug Addictions under the Slovak Republic Elementary School Conditions

Abstract

The study deals with the task of a social pedagogue in the prevention of drug addiction in elementary schools as well as with selected aspects of the primary prevention in the Slovak Republic. The author also points to the tasks of the coordinator of drug addiction as well as other pathological phenomena, and she also pays attention to the aspects of free time in the drug addiction prevention in elementary schools.

Key words: *social pedagogy, toxic-manic disorder, drug addiction prevention, prevention programmes, prevention coordinator.*
