## Scrutinizing Pupil's Social Status by Means of a Sociometric Questionnaire

### Abstract

This contribution is directed to the way of identification of the social status of a pupil in a school class by means of scrutinizing the ratio between positive and negative choices in the sociometric questionnaire without a choice limitation. In order to find out the social status, two indexes were used: The Index of accepts of the scaled social status Index as well as the Index of non-accepts of the scaled social status of an individual in a social group.

**Key words:** *Scaled social status, the Index of accepts of the scaled social status, the Index of non-accepts of the scaled social status.*
